

Electric Vehicle Charger Rebate Program

For Residential Customers

Electric vehicle (EV) enthusiasts have helped to make Georgia a top-ranked market nationwide for electric and plug-in hybrid vehicles. Georgia Power is committed to supporting our residential customers who have made the switch to clean transportation – including more than 200 Georgia Power employees – with rebates, education and services through our Electric Transportation Pilot Program.

In addition to developing a robust network of public charging stations, Georgia Power is pleased to introduce our Electric Vehicle Charger Rebate Program, which offers incentive programs to help offset some of the costs associated with residential EV charger installations.

Benefits for Homeowners

- Take advantage of state and federal incentives and tax credits on electric vehicles and chargers.
- Improve commute time and cost savings with free HOV/HOT lane access.*
- Save money on fuel and vehicle maintenance costs.
- Protect our environment with quiet, efficient and clean transportation.
- Get safe, efficient and faster EV charging.

Electric Vehicle Charger Rebate Program

Georgia Power residential customers may qualify for a \$250 rebate for each new Residential charger purchased and installed.

Eligibility requirements:

- Must be a Georgia Power customer
- 208/240-volt Level 2 charger with dedicated circuit
- Single-family homes
- Third-party vendors or EV charging businesses not eligible

Rebates available for installations completed between January 1, 2015, and December 31, 2015, subject to all terms and conditions available online at georgiapower.com/ev.

** Alternative fuel vehicles displaying the Georgia alternative fuel tag may use the HOV/HOT lanes without paying a toll.*
